

THE POWER OF PARTNERSHIP

DO YOU KNOW HOW MUCH YOU'RE PAYING?

The **Price-Change and Inflationary Reports** are insightful tools to show pricing changes on products that you currently purchase and inflation predictions on all food categories for the upcoming quarter.

These tools will allow you the opportunity to make informed decisions to adjust your menus and recipes based on the market trends and current purchasing.

Available at no
cost to US Foods®
Premier members

With the **Price-Change and Inflationary Reports**, you can:

- Access reports 24/7
- Keep an eye on inflation rates and price changes
- Analyze your menu offerings and recipes based on market conditions

How does it work?

The Price-Change Report is available to you on Food Service Direct Order within Business Analytics®. You have the ability to access the report as you want to review, 24/7. The tool will identify any products that have had a price change, whether increase or decrease, over the prior month on all items on your master order guide.

The Inflation Report provides, by category and overall, the projected percent increases and decreases in pricing based on past and future projections. This report is available from your US Foods® representative.

Make informed decisions.

These tools can be utilized to analyze your menus and recipes within your operation to make informed, needed changes to ingredients based on market conditions.

Work with your US Foods representative for any changes in product usage to ensure that your menus are optimized.

Get started with Price-Change and Inflationary Reports today!

Price-Change and Inflationary Reports are available exclusively to US Foods customers. For more information, contact your US Foods representative.
